

APRIL CASAMA

OPERATIONS SPECIALIST

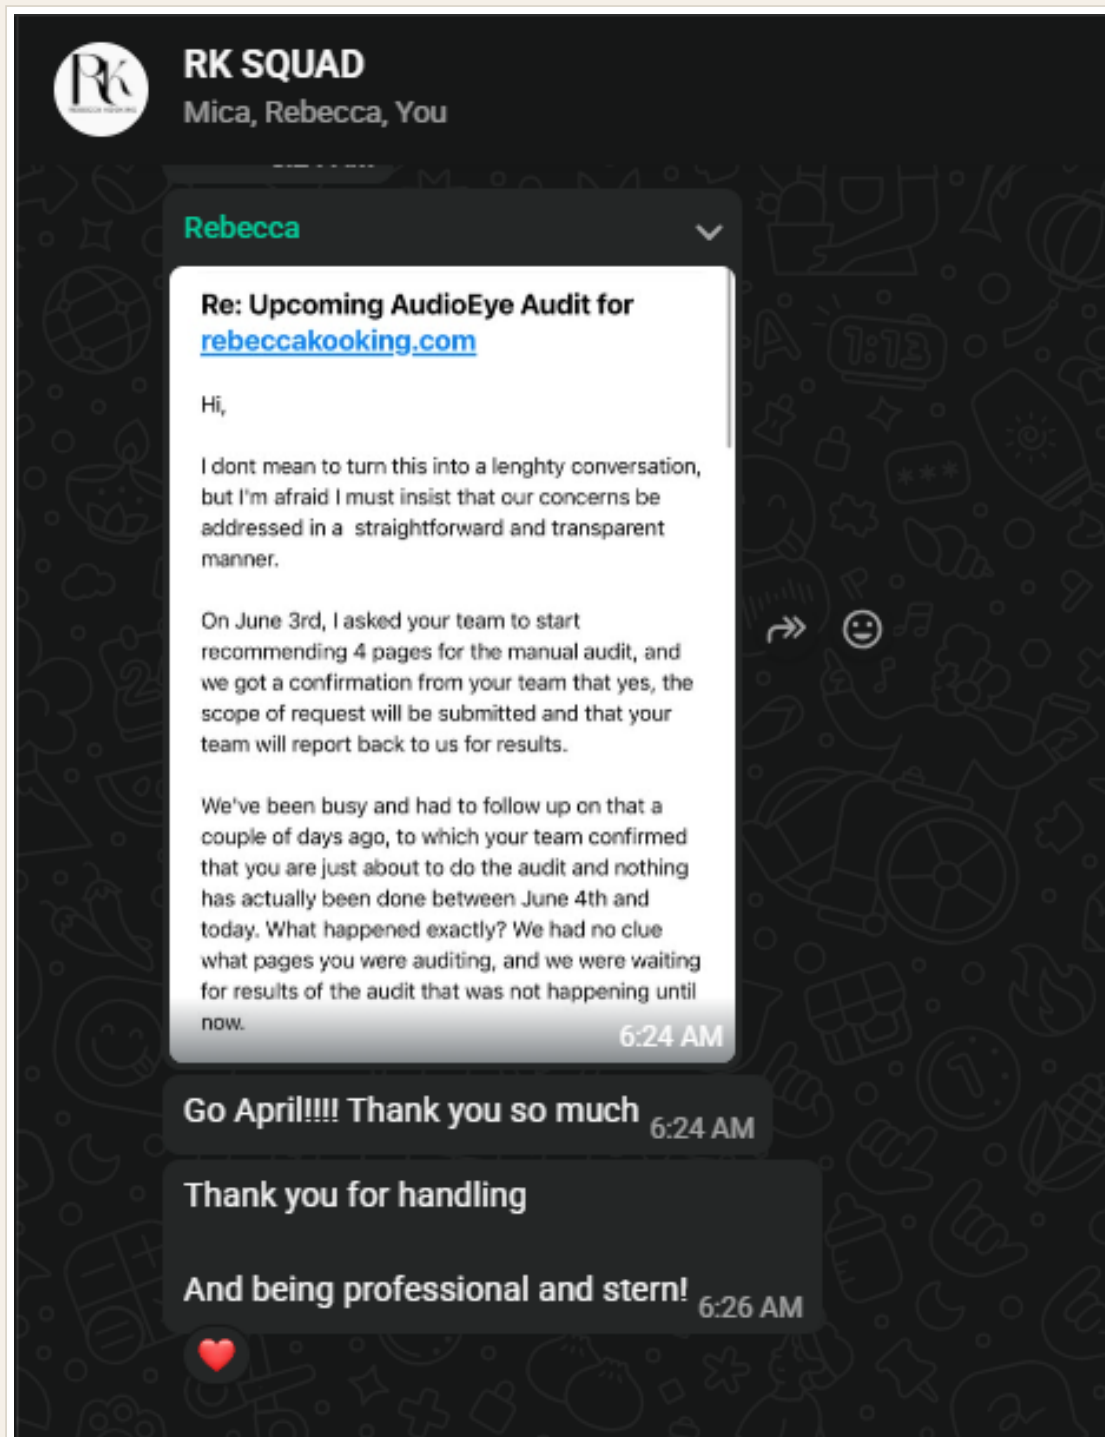

Client Testimonials

Unprompted messages from the founder of Kooking LLC,
sent in the middle of live work. Reproduced as received.

"Go April!!!! Thank you so much. Thank you for handling — and being professional and stern!"

A contracted vendor stalled a website accessibility compliance audit for over a month with no communication. April tracked down the issue independently, escalated directly, put the facts on record in writing, and demanded a transparent resolution — before the founder knew there was a problem. The founder forwarded April's email to the team with this message.

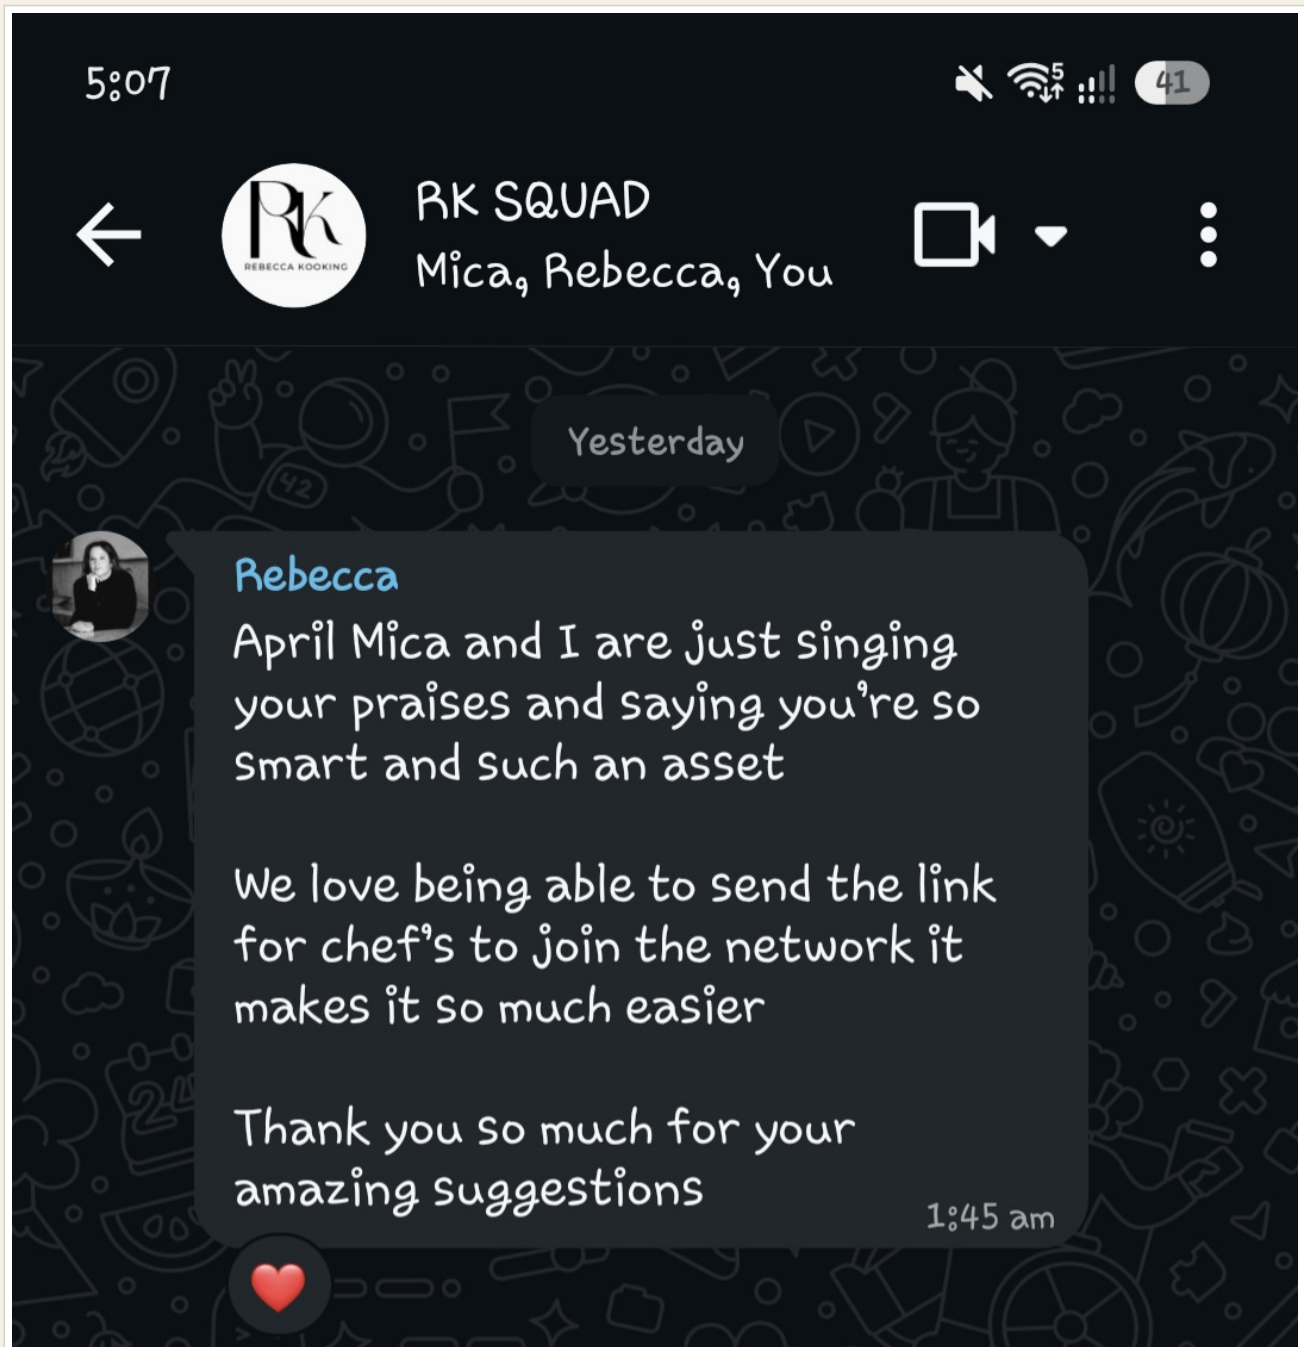

Founder message — RK Squad group chat.

"April, Mica and I are just singing your praises and saying you're so smart and such an asset."

The chef intake process ran in a fragmented sequence — Google Form, manual Canva card creation, manual document upload into Loxo. April redesigned it end to end: documents now land in Loxo where they are secured and auto-parsed, the form captures profile details, and card production is partly automated. One shareable link replaced the entire back-and-forth.
