Chef Profile Card

Google Forms → Canva → CSV → Loxo ATS • 10–15 min per card

Client-ready presentation cards built from Google Intake Form submissions — photo, bio, cuisine expertise, specialties, sample menu, and personal narrative. Completed cards are followed by a CSV upload of chef data into Loxo, keeping the talent database current without double entry. Production time cut from 20–30 minutes to 10–15 minutes per card, freeing the founder from hours of manual creation she previously handled herself.

Website Accessibility Integration

AudioEye · Squarespace · JavaScript injection · Live deployment

The AudioEye accessibility widget integrated into rebeccakooking.com through custom JavaScript injection in Squarespace, deployed without disrupting frontend performance. The widget runs automated accessibility scanning and surfaces quick-fix issues that require no code changes. The manual compliance audit runs as a separate ongoing process, managed independently — including holding the vendor accountable when progress stalled.

LinkedIn — Niche Strategy

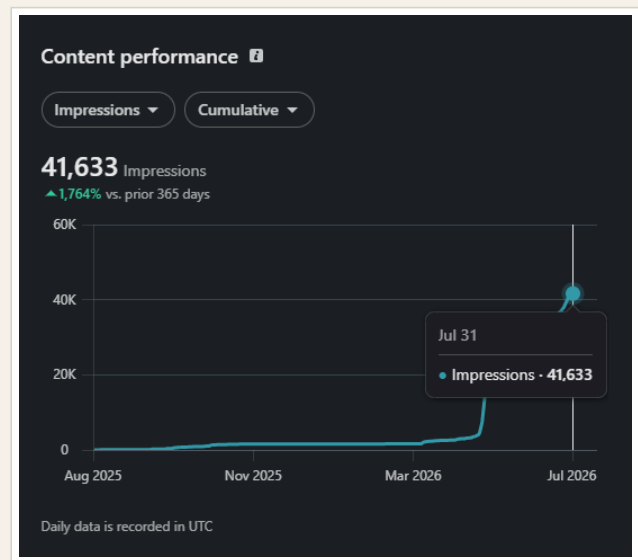

2,474 followers · 41,633 impressions · 90 days · zero paid promotion

Built from 100+ legacy corporate connections and a blank content slate. Content was targeted deliberately at a single niche — UHNW estate recruitment — speaking to estate managers, directors of residences, chiefs of operations, and other decision-makers in private service. By 31 July 2026: 2,428 new followers and 41,633 impressions, +2,811% follower growth and +1,764% content reach.

THE APPROACH

Identify a specific audience. Build credibility with content written for them and no one else. Stay consistent. The numbers follow.

Let us work together.

Available for remote support, project-based work, or long-term collaboration.
